Inspection Memo
to Coal File

RE: Beaver Creek Coal company
Wild Horse Bridge Project
CEP/015/007
Emery County, Utah

An inspection was conducted at the above mentioned exploration site on November 4, 1983 by Barton Kale of the Division. The purpose of the visit was to evaluate compliance at the site.

Upon inspection it was found that all culverts were open, and the drainage was not blocked by debris. The high walls were hydroseeded three quarters of the way up the road.

Some non-coal waste (trash) was found around one of the pit sites and should be taken care of when weather permits.
